

Typical Hardware Spec-Sheet for: Timberline Locks

The CompX Timberline series cam locks are best used in door applications where the cam plate locks at either the 3 o'clock or 9 o'clock position. These locks mount easily and securely in 3/4" material with two screws. The other benefits and features include:

- Available in 90 or 180 degree versions
- Cams change easily
- CB-170 version for use in material from 7/8" to 1-3/8"
