Blum CLIP top 120 Degree Hinges

Blum CLIP top 120 Degree Hinges

CLIP top hinges are concealed hinges for cabinet doors, meaning they cannot be seen when the door is closed. These hinges are easy to use and they work in almost any hinge application because of the wide variety of mounting plates available. That's right, these Euro hinges can be used in frame-less and face frame cabinets.

CLIP top hinges come standard as a self close hinge, and can also be easily upgraded with soft closing BLUMOTION making them a flexible and reliable option for any cabinet.

Easy and precise three-dimensional door adjustment
CLIP top comes with variable three-dimensional adjustment, including a spiral screw for depth adjustment. Selected mounting plates also have cam height adjustment.
